

## 4G Aerial Upgrade Kit

Please follow the instructions below if you wish to upgrade any existing aerial cables to a Single 4G High Gain Aerial Ext/Int for the DualCom Pro Range. The kit is available to purchase via the **Shop** section of CSL Live. The product code is CS.1.150.

**Step 1** - Cut the wire of the existing 2/3G aerial

**Step 2** - Fit the pin to the SMA male connector

**Step 3** - Connect the SMA male connector (with the pin fitted) to the existing cable

**Step 4** - Crimp the SMA male connector to the existing cable

**Step 5** - Screw the SMA connectors together

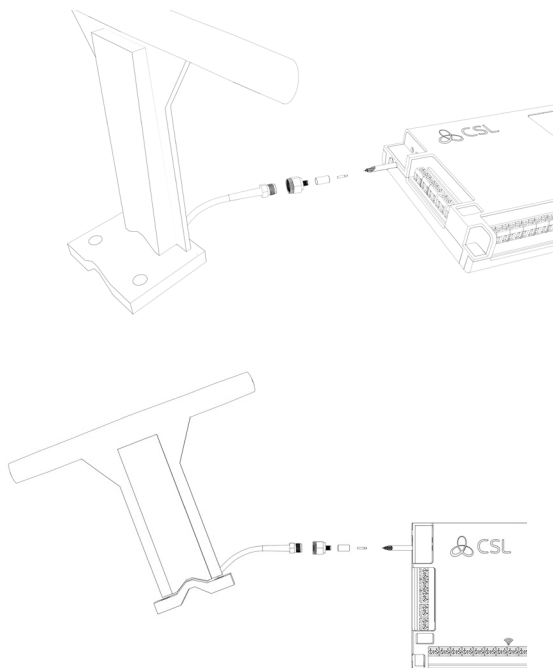

**Step 6** - Fit the new 4G aerial to the wall

### What is included in this kit?

- Separate SMA connector
- Pin
- Metal sleeve

Note - a crimping tool is not included but is recommended to use to join the cable and aerial together.
