

COMPACT POWER SUPPLY UNIT FOR DIGIAIR

Based on feedback from our Installers we are now pleased to offer a new DigiAir bundle complete with a Compact Power Supply. It has been designed to power a DigiAir in instances where the control panel is unable to consistently provide 12v DC, which is especially important when Installers choose to use a self-contained wireless panel. For a quick and easy installation, it can be purchased from your ARC with a DigiAir pre-fitted. It is also available as a standalone purchase - contact us to find out more.

THE NEXT GENERATION WIRELESS DIGITAL COMMUNICATOR WITH ZERO CALL COSTS

Benefits and Features

- Specifically designed to fit DigiAir/DigiAir UDL
- Purchase as PSU only or bundle with DigiAir UDL for no upfront cost
